SLAMMING HIM.

"When I was abroad," said the boastful person, "I stood among the peers of Europe."
"Oh, so you spent your time visiting the wharves did you?" asked the sarcastic man.

Jury Disagrees.

The jury in the case of the State vs. Garrett Johnson and Arthur Clow, alleged leaders of the Keelboat Lake night rider band, and charged with the murder of Capt. Quentin Rankin, filed into Judge Jones' courtroom Wednesday at Union City, Tenn., and reported that they could not possibly agree on a verdict and were discharged. The jury stood ten to two in favor of conviction.

Insure with W. O. Hinton in Prompt paying non-union companies.

Cook's Data Insufficient.

The University of Copenhagen, the first institution of learning to recognize Dr. Cook's claims as the discoverer of the North Pole, Tuesday declared that the explorer had signally failed to prove his claim from the records submitted. Branded as an impostor by many of the leading scientists of the world, Dr. Cook's whereabouts are not even known to his most intimate friends. Dr. Cook's data were said to have been deficient in every way.

Williams' Kidney Pills.

Williams' Indian Pile Ointment will cure Blind, Bleeding and Itching Piles. It absorbs the tumors, allays itching at once, acts as a poultice, gives instant relief. Williams' Indian Pile Ointment is prepared for Piles and Itching of the private parts. Sold by druggists, mail 50c and \$1.00. Williams' Mfg. Co., Props., Cleveland, O.

For sale by Oberdorfer.

A Mixed Menu.

"Say, isn't young Mrs. De Ton getting the week badly mixed up?"
"In what way?"
"I heard my sister Mabel tell her chum the other day that Mrs. De Ton had sundaes on her Tuesdays."

Wanted Protection.

"Pardon me, your honor," said the young lawyer, "but I'd like to arrange for police protection hereafter when I have business in this court."
"What do you mean, sir?" queried the astonished judge.
"I mean what I say, your honor," replied the young lawyer. "Yesterday I lost a suit here and to-day my hat is missing."

QUICKSAND.

How It Is Formed and Its Growsome Characteristics.

To most persons the word "quicksand" gives a sensation of horror similar to that produced by the thought of a snake, and many sensational accounts have given to quicksand almost human attributes. No ordinary observer would be able to distinguish dry quicksand from any other sand, and the average person would be unable to restore it to its "quick" properties even if he tried. If water is mixed with the quicksand the mass does not become mobile, and if the water is drained off the sand will be found firmly packed.

Quicksand is comparatively very light, weighing about ninety-four pounds to the cubic foot, while other forms of sand run as high as 171 pounds. Quicksand when examined under the microscope will be found to have rounded corners, like river sand, as distinguished from "sharp" sand. It is quicksand that is used in hour-glasses and egg glasses, partly because of its fineness and partly because it does not eventually cloud the glass by scratching, as would the sharp sand. It is to its lightness that quicksand owes its deadly qualities, and a demonstration of how it becomes "quick" may be given by placing a quantity in a bucket and adding water by pressure through a hole in the bottom, allowing the water to overflow very slowly when it has worked up through the sand. The upward current will be found to loosen the sand and to raise the surface very slightly, separating and lubricating the particles so that they are easily displaced.

The bucket now contains genuine quicksand. The sand, owing to the support it receives from the water, has its weight, or supporting power, reduced proportionately, weighing in the water but thirty-two and a half pounds as against ninety-four pounds when dry. Bulk for bulk, the mixture is nearly twice the weight of a man, but is too mobile to give support and too thick to swim in. In its natural state, presenting an apparently firm surface, resembling simply damp sand, it is the most deadly man trap conceivable.

Quicksand requires in all cases an upward current which is not quick or strong enough to break through in the form of a spring. Ordinarily water flowing over quicksand will not make it dangerous. It may be formed in tidal rivers and on the shores of tidal seas by the rising tide saturating a porous stratum of ground below high water mark, and when the tide falls a return current is established through the porous (sandy) ground with a sufficient velocity to loosen the sand and make it "quick."

A permanent quicksand is found where a slow current of fresh water finds its way to the surface of the sand bed either in the bottom of a stream or elsewhere. Quicksands that are encountered during the sinking of walls and foundations are due to the influx of water when the work gets below "spring level" or the level of the water in the ground at that particular spot. The sand, being deprived of the lateral support of the water in the excavation, is pushed in from behind by the water currents flowing from all sides.

One of the most peculiar and growsome characteristics of quicksand is that it will soon engulf any object cast upon its surface, no matter how light that object may be, even a perfectly dry stick.—Harper's Weekly.

Eggs Worth Millions.

Two punched eggs on toast once formed the foundation of the great New York stock market. If the eggs were eaten securities advanced in price; if left untouched Wall Street shivered and quotations crumbled. One morning the eggs proved worth a thousand times their weight in gold, for the news that they had been eaten with relish added 2 per cent to active stocks. Even 1 per cent on the \$10,000,000,000 securities listed on the New York exchange would be equivalent to \$100,000,000. By such trifles Wall Street swayed when seized by hysteria, when hypnotized by a personality, when lost to the sound reason that usually governs its actions.—Bert C. Forbes in Van Norden Magazine.

It Sounded Hopeful.

A young man who was not particularly entertaining was monopolizing the attention of a pretty debutante with a lot of uninteresting conversation.

"Now, my brother," he remarked in the course of a dissertation on his family, "is just the opposite of me in every respect. Do you know my brother?"

"No," the debutante replied demurely, "but I should like to."—Lippincott's.

The Only Way.

"Is there any method that will enable a man to understand a woman?" queried the innocent youth.
"The only way to understand a woman," replied the home grown philosopher, "is not to try. Under these circumstances she will reveal herself sooner or later."—Chicago News.

No Chance of That.

The beggar accepted gratefully a nickel from the professional humorist.
"Thank you, sir," he said, his voice vibrant with deep feeling. "Oh, thank you, sir, and may you live to be as old as your jokes!"—Washington Post.

Of Course.

Reporter—Professor, what language do you suppose the people nearest the north pole speak? The Professor—What a question! Polish, of course.—Chicago Tribune.

THE VICIOUS PECCARY

A Fierce Creature Is the South American Wild Boar.

HE IS SMALL, BUT FEARLESS

Will Attack Man or Any Animal In Existence on the Slightest Provocation and Will Fight to the Death—A Battle With a Jaguar.

During one of his journeys into Mexico Edward W. Walton, a mining expert, had a close call from being sliced to shreds by the fierce little South American pig known as peccaries. He told the story of his escape to a Denver Post reporter.

"I wished to secure some plumes from a number of the beautifully plumaged birds," said Mr. Walton. "I went into the jungle and came to a small opening in which there were dry leaves, probably a foot in depth, covering the ground, and hundreds of beautifully colored tropical birds in the air and in the trees. I fired at one of the birds in flight, when it seemed to me the whole area of these dead leaves arose in front of and all around me. Being a stranger, naturally I was much frightened, especially when I saw the animals which raised up the leaves apparently ready for an attack. The older animals opened and closed their mouths, showing their big, sharp tusks, formed much like a dirk knife, and some of them started toward me. Impulsively I commenced firing my gun in the air and turned around, which seemed to stop most of them momentarily, and as I had lots of cartridges I kept up the shooting, and they turned and ran away. I found afterward that I had saved my life by so doing and by not shooting any of the animals.

"These animals proved to be peccaries. They are most ferocious and will attack any animal in existence on the slightest provocation. When I got back to headquarters and told my companions my experience I was informed that had I shot one of the animals and made him squeal the whole bunch would have been on me and would have torn me to pieces quickly. They have been known to kill bears, jaguars, cattle, horses and any number of dogs. Although in the fight scores of their number might be killed, they seem to have no fear when once aroused.

"I was told the peccaries burrow under the dry leaves to protect themselves from mosquitoes and other winged pests of that hot country. My friends had many exciting experiences to tell in regard to these ferocious little animals. One of this party, while traveling with a companion in a wagon, stopped for lunch under some trees and turned their horses out to graze. While at lunch a large bunch of peccaries appeared, and they thought it would be nice to shoot among them and get one or two for meat, so they fired into them, wounding several, which commenced to squeal. Then the whole bunch made an attack. The men climbed quickly into the wagon and kept on shooting so long as the ammunition which they had in their pockets lasted. As they were opening their bags to get out more ammunition the peccaries climbed up the tongue of the wagon and jumped into it, and the men saved themselves only by jumping on to the seat and then on to limbs of the trees, the peccaries taking possession of the wagon and tearing things to pieces. They remained in possession for hours, the men watching them from safety in the trees."

The peccary, or South American wild boar, is the smallest of his species, averaging about three feet long, nor is the animal possessed of any unusual degree of strength. To make up for the natural individual deficiencies in combat with the more powerful animals of the jungle the peccaries always travel in large herds. When once attacked by a herd of peccaries the outcome is nearly always death to their enemy. The little pigs are armed with short sharp tusks, and no matter how great the slaughter of their own number during the melee the herd stay on the job until the work is finished.

Travelers in tropical and South American countries tell of fierce encounters between the peccaries and the jaguar, the monster cat which is lord of the forest. The jaguar has a fondness for a dinner of pork, but a whole-some respect for the power of a herd of wild pigs. When he wants to satisfy his cravings for a pork diet he drops from a limb of a tree on to the back of a straggler in the peccary herd. The jaguar slays his victim and then retreats hastily to his tree before the herd can get at him. When the herd grows tired of waiting for him to come down and moves along the jaguar descends and enjoys his meal at leisure. Frederick Selous in his romance of the animal world has an interesting account of a fight between a jaguar and a herd of peccaries. The peccaries had the jaguar treed on the limb of a tree from which the bark had rotted away. He was only a few feet above them and by harassing and jumping at their enemy finally succeeded in bringing the conflict to the ground. After the fight was over there were eleven killed and wounded peccaries, but the jaguar was literally torn to pieces.

Same Thing Now.

"You know woman was once the head of the family," she said.
"No need to speak of that in the past tense," replied her husband meekly.—Philadelphia Ledger.

The most sublime act is to set another before you.—William Blake.

Flatulence

When every bite you eat seems to turn to gas and your stomach and intestines cause you endless discomfort, it is an unfailing sign that your entire system needs a thorough housecleaning.
